

HOW TO CONNECT TO GUEST WIFI (1/2)

To enable a user or visitor to connect to the Guest Wi-Fi, please follow the instructions below:

1. Open your device's Wi-Fi settings and connect to the **GuestWIFI** network.
2. Once connected, your default web browser should automatically redirect you to the **Guest Portal – Sign On** page. If this does not happen, try forgetting the **GuestWIFI** network and reconnecting.
3. On the Sign On page, click "**Don't have an account?**" located below the Sign On button.

The screenshot shows the "Guest Portal" sign-on interface. It features a "Sign On" section with "Username" and "Password" fields, a "Sign On" button, and a "Don't have an account?" link below it. A "Contact Support" link is at the bottom.

4. Complete the registration form, ensuring you include the country code with your phone number. The phone number and email address you provide will be used to send your temporary account credentials.

The screenshot shows the "Guest Portal" registration interface. It includes fields for "First name*", "Last name*", "Email address*", "Phone Example +16141234567", and "Company". Below these is a "Guest Wireless Access Acceptable Use Policy" section with a detailed legal notice and a signature line for "Officer: Dott. Donato Eugenio Caccavella, al dpc.vertiv@americas.ao". At the bottom is a "I agree to the terms and conditions" checkbox and a "Next Step" button.
